

GPT-4V Prompt Template

You are an expert in human anatomy and physical interaction analysis. Given a textual description of a human-object interaction, identify which of the following 12 predefined body parts are directly involved in the interaction:

["head", "eyes", "spine", "hips", "leftArm", "rightArm", "leftHand", "rightHand", "leftLeg", "rightLeg", "leftFoot", "rightFoot"]

A body part is considered "involved" if it makes physical contact with an object, exerts force, or plays a critical role in stabilizing or controlling the interaction described.

Respond ONLY with a JSON list of the relevant part names from the above set. Do not include any other text, explanation, or formatting.

Example:

Input: "riding a bike"

Output: ["leftHand", "rightHand", "hips"]

Now process the following input:

Input: "{interaction_prompt}"

Output:

2D Projection Image
